

Tyler Yates

(256) 275-1324 | tyler.yates2017@gmail.com | Orlando, FL

PROFESSIONAL SUMMARY

Product and technology professional with 3+ years of combined business and digital experience across software engineering, Agile delivery, project leadership, and guest-facing digital products. Experienced in translating business and user needs into requirements and user stories, supporting roadmap and backlog prioritization, resolving technical blockers, and partnering across Engineering, Design, QA, and business stakeholders. Proven track record improving product reliability and delivery outcomes through data-informed decision-making and cross-functional collaboration.

SKILLS

Product Management & Delivery: Product Lifecycle Support, Requirements Gathering, Requirements Analysis, User Stories, Acceptance Criteria, Backlog Refinement, Roadmap Support, Release Readiness, Cross-Functional Product Delivery, Continuous Improvement

Testing & Operations: Product Testing, UAT, QA Collaboration, Release Validation, Incident Resolution, Risk Tracking, Process Documentation, Operational Support

Technical & Tools: Jira, Confluence, Figma, APIs/JSON, SQL, CMS, accessibility (WCAG), error and performance monitoring

Stakeholder Management: Requirements Discussions, Executive Presentations, Priority Alignment, Delivery Status Reporting, Dependency Management

CERTIFICATIONS

Professional Scrum Master I (PSM I) - Scrum.org, 2026

Professional Scrum Product Owner I (PSPO I) - Scrum.org, 2026

EXPERIENCE

Engineering Planner

January 2026 - Present

Lockheed Martin

- Support product and technology delivery across cross-functional Agile teams, partnering with business and technical stakeholders to refine requirements, align priorities, manage dependencies, and move work from backlog refinement through release readiness.
- Partner with business and technical stakeholders to clarify requirements and priorities, identify delivery blockers, manage risks and dependencies, and align team capacity with product and project commitments.
- Create project health dashboards and leadership reports that communicate progress, dependencies, delivery risks, and team performance.
- Standardize Jira and Confluence workflows and documentation practices to improve delivery visibility and cross-team coordination.

- Support resource and capacity planning by identifying staffing needs and aligning available resources with product and project priorities.

Software Engineer

September 2024 - January 2026

CAE

- Partnered with hardware and software stakeholders to translate user, regulatory, and release needs into technical requirements and execution plans for digital training products.
- Investigated and resolved software and systems-integration issues, reducing simulator incidents by 94.3% and improving product reliability and user experience.
- Prepared stakeholder updates and leadership presentations covering roadmap alignment, delivery risks, development progress, and release readiness.

Software Engineer Intern

January 2024 - April 2024

Universal Studios Orlando

- Supported Agile product development and delivery for guest-facing mobile experiences at Universal Studios Orlando.
- Wrote user stories and acceptance criteria in partnership with Design and QA, supporting delivery from backlog refinement through release.
- Presented guest-facing features to stakeholders, gathered feedback, and helped incorporate findings into roadmap prioritization.
- Published time-sensitive content updates, validated mobile rendering, and supported WCAG accessibility compliance.

Project Manager

November 2019 - May 2021

Astrion

- Led a cross-disciplinary engineering team, developed delivery roadmaps, facilitated daily standups, and managed dependencies across technical workstreams.
- Introduced process improvements that reduced delivery time by 12% while maintaining established scope and budget guardrails.
- Partnered with technical and external stakeholders to clarify requirements and acceptance criteria, resolve scope conflicts, and support successful product and system handoffs.

IT Specialist

September 2018 - June 2019

United States Army

- Maintained network infrastructure, including routers, servers, and firewalls, to support secure military communications.
- Resolved hardware and software issues in time-critical, live operational environments.
- Prioritized and delegated tasks to team members to ensure all technical objectives were met ahead of schedule.

EDUCATION

Florida Institute of Technology

Master of Science in Computer Information Systems, 2026

Full Sail University

Bachelor of Science in Computer Science, 2024
Valedictorian | Dean's List | Course Director's Award
